Kryon is a leader in enterprise automation, offering the only platform on the market which encompasses both Process Discovery and Robotic Process Automation (RPA). This end-to-end solution maximizes ROI and cuts implementation time by up to 80%.

Powered by proprietary AI technology, Kryon Process Discovery™ automatically generates a comprehensive picture of business processes, evaluates them and recommends which ones to automate. Kryon offers attended (desktop) RPA, unattended (virtual-machine-based) RPA and a hybrid combination of both. The company’s award-winning platform is used by enterprises worldwide, including AIG, EY, Deutsche Telecom, Ferring Pharmaceuticals, HP, Microsoft, Santander Bank, Singtel Optus, Sberbank, Verizon, and Wyndham Hotel Group.
While our full-cycle automation suite is designed to be easy to use for the business professional, the technology that powers them is anything but simple. With five patents for AI-powered computer vision and machine learning technologies, Kryon continues to expand the boundaries of RPA, enabling companies to automate tasks that until recently were considered too complex for robots.

Learn More about the Kryon Automation Suite
The Kryon Difference

Kryon is a trailblazer in the world of enterprise automation, offering today’s most-versatile, comprehensive, and user-friendly set of RPA solutions for businesses of all types. Unlike other RPA vendors, Kryon supports continued process optimization by visualizing companies’ day-to-day activities, discovering their repetitive processes, recommending which processes to automate, and creating automation workflows.

Na-il Han, Head of Finance Transformation

We’ve been able to leverage the Kryon Solution to actually increase revenue across the enterprise...And I believe this is an area where other people should really be looking at.”
Scott Strickland, EVP and CIO
